SUMMARY

Hello everyone, I'm Soham Sonar, and I'm thrilled to share my journey with you. I kickstarted my career in education at the young age of 18, teaching at Disha Comp Institute. Fast forward to today, I've evolved into a senior instructor and established myself as a proficient web developer. Along the way, I've been fortunate to clinch numerous awards at hackathons, both formal and informal, organized by colleges and other platforms. Join me as I continue to push boundaries and make strides in the realms of technology and education. Let's innovate together!.

EXPERIENCE

Jan 2023 to Apr 2024
Sr. Programming Instructor – Disha Computer Institute

PROJECTS

- **Sweet Shop Website** – **Wordpress ,Bootstrap, Figma.**

  ➔ **Project Description: Mawa Sweets Website**

  Mawa Sweets, a USA-based sweet shop, offers a unique website where customers can create personalized sweet boxes by selecting from a variety of traditional sweets. The site provides an easy-to-navigate interface, detailed product info, and a smooth checkout process, delivering a delightful and customized shopping experience.

- **Mental Health Support** – **JAVA, JSP, HTML, CSS, JS, MYSQL.**

  ➔ **Project Description: Mental Health Support Website**

EDUCATION

➢ M.M.V School
  SSC → 88.40%

➢ Abasaheb Garware College, Deccan, Pune.
  HSC(12th) → 63.33%

➢ ASM CSIT College of Sci. & Comm.
  BSC(CS)
  Last Sem (4th) → 8.27 SGPA
  Last Year Pursuing

KEY SKILLS

- MARKETING
- TEAM MANAGEMENT
- PROJECT MANAGEMENT
- LEADERSHIP
- COMMUNICATION

This personal project is a mental health support website designed to help patients book appointments with mental health professionals easily. The platform also features a 24/7 chat support system, providing round-the-clock assistance and guidance for those in need. The goal is to offer a secure, accessible, and user-friendly space for individuals seeking mental health support.

- **Library Management System** – PHP, MYSQL, HTML, CSS, JS, GitHub.

  → **Project Description: College Library Management System**

  This project is a library management system developed for my college library. It allows users to check the availability of books online and provides real-time updates on upcoming live events. The system ensures easy access to library resources and keeps students informed about library activities through an intuitive, user-friendly interface.

- **Online Exam System** – Java, JSP, HTML, CSS, JS, DSA, GitHub.

  → **Project Description: Online Exam Platform**

  This project is an online exam platform designed for students to take exams in various programming languages directly from the website. Upon successful completion, students receive certificates, helping them validate their skills. The platform offers a seamless and efficient way to conduct and manage exams, providing a user-friendly experience for both learners and educators.

- **Freelancing Portfolio** – HTML, CSS, JS, BootStrap, GitHub.

SKILLS

- **HTML5 ,CSS3 , JS , BOOTSTRAP , FIGMA DESIGNS**
- **JAVA , JSP & SERVLET , PYTHON , PYTHON GUI , PHP**
- **MYSQL , MSSQL**
- **DSA (SORTING , SEARCHING , LINKEDLIST , STACK , QUEUE)**

HOBBIES

- **Programming Sessions**
- **Weight Lifting**
- **Trekking**
